

# TURKS BARRED FROM CONSTANTINOPLE

## BOARD OF INQUIRY HEARS TESTIMONY IN BALLOON BLAST

### SEEK TO FIND REASON FOR FIRE AT FLYING FIELD.

#### NONE BADLY HURT

Faulty Construction Hinted; Tearing of Fabric Held Immediate Cause.

[BY ASSOCIATED PRESS.] San Antonio, Tex.—A board of inquiry, consisting of Lieut. Col. A. G. Fisher, Capt. G. W. McElhiney, Lieut. Donald Hutchins of Brooks field, will begin an inquiry Wednesday morning to determine causes of the explosion which destroyed the army dirigible C-2 Tuesday morning just as it was starting on an exhibition flight over the city, carrying 11 passengers.

Eight of the 11 were injured by jumping from 35 to 40 feet from the dirigible, just before its hydrogen gas and gasoline vapors ignited, but none was seriously hurt.

The 192 foot dirigible which had successfully completed a cross country flight from Langley field, Virginia to San Francisco, and was on its homeward voyage, is a complete wreck.

Commander to Talk Major E. A. Strauss, commander of the C-2, was to testify before the inquiry board his belief that the accident was caused by faulty construction of the envelope as the big dirigible started from the Brooks field hangar. This, in the opinion of some officers, implies that the fabric used in construction of the dirigible was not up to standard.

Major Strauss' estimate of the value of the C-2 was \$70,000. It originally cost the government \$70,000. A statement made by Major Strauss, who was slightly injured, said: "I ordered the ship back into the hangar. Just as we started, another gust of wind came and the fabric, which the standard handling guy was attached pulled loose."

Swings to Leeward Another handling guy broke under the sudden pressure and the third handling guy, releasing the bag and permitting it to swing to the leeward into the concrete structure at the base of the hangar door. The bag was torn. As the bag became the car broke in two places. Thirty seconds after the car broke the hydrogen in the envelope took fire due to the hole and rapid influx of air. The ship dived into the ground. The condition for the continuation of the transcontinental flight and the cross wind was not of such velocity as would cause any trouble in handling."

## Insane Farmer Beats Up Wife

[BY ASSOCIATED PRESS.] La Crosse.—Becoming suddenly insane while shopping in a store here Tuesday, Fred Stelling, a farmer of Jackson, Minn., attacked his wife, kicking and beating her until she fell unconscious. At a hospital, physicians found she had several broken bones and cuts about the head. Stelling is in a dazed condition. They have eight children.

## Marshal Forced to Aid Robbery

Everett, Wash.—Marshal C. E. Pym of Marysville was forced Tuesday by a band of four to assist him to the home of L. S. Smith, vice president of the Marysville State bank. Mr. Smith was routed out of bed and, with Marshal Pym, was taken to the bank and forced to open it. The vault, once locked, was not opened and the bandit left with \$41 in Canadian currency that was found in a teller's drawer.

## GO IN ONE COLUMN

Madison.—Independent candidates at the November election all go in one column on the ballot. R. H. Hoyt, deputy attorney general, filed.

## Territorial Effects of Turkish Armistice

Under the terms of the Mudania armistice Eastern Thrace will be turned over to the Turks within thirty days. This territory was taken away from the Turks in the territorial settlements made after the war and has been sought by the Turks ever since. The armistice, however, will pass upon the number of Turkish soldiers allowed in the area. New neutral zones in the Chanak and Ismid areas, of strategic value along the Dardanelles and Bosphorus, will be defined by commissions. The boundary of the neutral zone in the Constantinople peninsula has been set as has that of the Gallipoli peninsula. The map indicates the approximate line of both zones. Other terms of the armistice relate to evacuation of eastern Thrace.

## SHARON COUPLE IS STRUCK BY TRAIN

### Mrs. Benjamin Sherman in Critical Condition at Delavan Hospital.

[SPECIAL TO THE GAZETTE.] Delavan.—Mr. and Mrs. Benjamin Sherman, Sharon, narrowly escaped death and Mrs. Sherman is in a critical condition in the Delavan hospital as the result of an accident at the railroad crossing on the Delavan-Delavan road, near the Robert-Sturtevant farm, Tuesday afternoon.

Mr. and Mrs. Sherman were thrown to the ground when the buggy in which they were riding, driven by Mrs. Sherman, was demolished when struck by the caboose on a milk train backing up to the switch at Burdwell.

Both are elderly people and deaf. It was said, and carried an umbrella, to keep the wind off as they returned from Delavan to their home at Sharon. It is thought Mr. and Mrs. Sherman believed the train had passed the crossing going ahead. Instead it was backing up.

One horse was so badly injured, that it was killed. The buggy and a new stove which they were bringing home from Delavan was wrecked. Mr. Sherman was brought home by a neighbor. Mrs. Sherman was taken to the hospital at Delavan. No bones were broken but both are suffering from shock due to their advanced age.

## Dr. Paul Reinsch Is Ill in China

[BY ASSOCIATED PRESS.] Peking.—Dr. Paul S. Reinsch, former U. S. minister to China and since 1920, counselor to the Chinese government at Peking, is ill at Hankow. He is said to be suffering from hallucinations that the Japanese are trying to harm him. It is reported that he is to be removed to Shanghai.

## Pulls Gun Out of Boat; Hunter Dead

[BY ASSOCIATED PRESS.] Superior.—Wounded by a shot from his own shotgun, Thomas W. Cafferty, 37, is dead at St. Mary's hospital. He had accidentally shot himself above the heart while duck hunting.

Cafferty, who was accompanied by George Bantam, leaving his home when he was hunting, was dragging the gun after him by the barrel when the trigger caught, causing the gun to go off.

## WILL SETTLE CAVEY CASE OUT OF COURT, ATTORNEY ASSERTS

Settlement has been effected in the state's case against Leonard Cavey, 103 Galena street, according to J. G. McWilliams, defendant's attorney. Mr. Cavey was arrested on complaint of a Harmony township girl, who charged he was the father of a child born to her in August. Mr. McWilliams said a stipulation has been prepared. It was signed by District Attorney S. G. Dunwiddie before filing in municipal court.

## Youth, Bored by Stick, May Die

With his intestines punctured by a pitchfork handle, Henry Meyer, Jr., 21, living on South Jackson street, lies in Mercy hospital, putting up a terrific battle for life. Meyer slid from the top of a hayrack at pit No. 3 of the Janesville Sand & Gravel company Tuesday afternoon. On the downward journey, he was upon the upland of the hayrack with the full force of the drop, the circular stick tearing through his trousers and flesh, plunging into his body for more than 12 inches. The wood broke off a short distance from the opening of the jagged wound.

Another employee who had gone with Meyer to bind down the top of the rack because of the high wind, procured aid and the handle was removed. Meyer was rushed to Mercy hospital where three surgeons operated upon him Tuesday night. Little encouragement was given for his recovery Tuesday, but hope was held Wednesday by the fact the lad is putting up that he may live, unless complications set in.

## \$6 Soft Coal Price at Mines Determined for "Smokeless Field" Fuel

[BY ASSOCIATED PRESS.] Madison.—A maximum price of \$6 a ton at the mines for prepared sizes of bituminous coal for domestic use has just been agreed upon by the operators of the "smokeless" field of West Virginia, furnishing the greater part of Wisconsin coal. P. H. Pressentin, secretary of the state fuel committee, announced Wednesday. Freight charges, he said, will probably double this price before it reaches the state.

A conference is being held Wednesday between operators of coal mines and coal producers, distributors, east of the Mississippi river and the federal fuel distributor, to decide on a maximum price on soft coal for these districts. An agreement has been reached.

## 2 ELKHORN CASES SETTLED BY JUDGE

Two Suits Concluded Out of Court; Three Still Pending.

Elkhorn.—Settlement of cases scheduled for trial at the October term of Walworth county circuit court in session at Elkhorn has thus far prevented any work by the jury. Judge Belden settled the case of the Acme Realty company against the State Bank of Elkhorn, without trial, in favor of the plaintiff. The plaintiff contended that the State Bank of Elkhorn had no claim on a collection of \$800 made for the plaintiff and from which they deducted interest on a note held against the concern. Judge Belden ordered the defendant to pay the amount withheld.

Joseph and Anna Forge, settled out of court their suit against T. W. Morrison, Elkhorn, involving the sale of a cow. The suit of Walter Daily against Walter Foush is scheduled for trial Wednesday. Other cases remaining are those of Paulsen vs. J. H. Long, Charles Cole vs. Frank Cole, guardian, vs. the Chicago, Milwaukee and St. Paul railroad.

## Beloit Man, 91, Is Dead at Home

[BY ASSOCIATED PRESS.] Beloit.—Ralph Lidster, 91, one of Beloit's oldest residents, died at his home Tuesday. He was the oldest Mason in the city and one of the oldest in the state, having joined the Masonic order in Beloit, Ill., 91 years ago. He is survived by one daughter, three sons, 12 grandchildren and 22 great grandchildren.

## STOUT HAS 537 STUDENTS

Madison.—The enrollment of Stout Institute, Menomonie, has jumped to 537 this year, according to enrollment figures just published. This is an increase from 455 last year and from 281 in 1920.

## MORE LOVE NOTES IN MURDER CASE

### Woman's Letters to Rector Filled with Terms of Endearment.

[BY ASSOCIATED PRESS.] New Brunswick, N. J.—A second series of the letters said to have been written by Mrs. Eleanor Milik, wife of the church sexton and choir leader, to the Rev. Edward W. Hall, was made public Wednesday by the authorities. The letters, which were referred to as "sweet, adorable baby," they speak of "a love nest" of a woman's dreams of "true love" and describe the varied moods of a woman who "loved and loved without the conventions."

Mrs. Hall was summoned from her home Wednesday to open her safety deposit vault at the People's National bank. What was found in the vault was not disclosed.

Meanwhile, detectives were checking up on newly acquired information. Great secrecy as to its nature was maintained. One angle, it was learned, necessitated a trip to Lavallette, N. J., home of Henry Stevens, brother of the rector's widow.

## Denies Tiernan Ousted at Hotel

South Bend Ind.—Prof. John Tiernan, Notre Dame law instructor, who recently charged that Harry Paulin, factor-dispatcher, was the father of his son, said he was not ousted from the hotel here as has been reported. W. N. Danner, secretary of the local Y. M. C. A. said Wednesday. Mr. Tiernan had said that a hotel catcalled to single men and that, because of the crowded condition, Mr. Tiernan's application for a room was not accepted.

## British Protest Booze Seizures

Washington.—A protest against continued seizure of British vessels by prohibition agents, operating under the state department Wednesday on behalf of the British government.

## 247 Taken From Grounded Vessel

St. Augustine, Fla.—If the 247 passengers have been safely transferred from the Clyde steamer Lenape, which went around Tuesday to the steamer Avonport, and efforts to float the Lenape are continuing, according to the U. S. wireless station at Anastasia Island.

## Home of Plumber Wrecked by Bomb

[BY ASSOCIATED PRESS.] Minneapolis.—The kitchen and rear porch of the home of Aaron Harris, a contracting plumber, were demolished early Wednesday by the explosion of a bomb. Members of the family were uninjured by the explosion, which shattered every window in the house and scattered splinters for several hundred feet. Harris could advance no theory as to the motive, but said it was a second attempt.

## WASTE PAPER SAVES BIG TIMBER ACREAGE

[BY ASSOCIATED PRESS.] Chicago.—More than 300,000 acres of timber in the United States have been preserved this year for the future by the use of waste paper in the manufacture of new, Greilet Collins, president of the Book Paper Manufacturers' association, told members at their meeting here Wednesday.

## AMERICAN LEGION MARCHES THROUGH HISTORIC STREETS

### THOUSANDS OF BUDDIES PARADE AT NEW ORLEANS.

#### OWSLEY FAVORITE

South May Unite Behind Texas Man for Commander of Veterans.

[BY ASSOCIATED PRESS.] New Orleans, La.—The American Legion, following a brisk business session, today, paraded New Orleans afternoons. Through miles of narrow, stone paved streets, down the broad promenade of Canal street, winding in and out of the "vieux Carre," (old town) escorted by the Spanish and French founders of New Orleans, the veterans of 1918 marched.

Major Allison Owen of New Orleans was marshal of the day. Leading the parade was the "guard of honor" comprised of four men each from every army, marine and national guard.

At the review stand in front of the city hall, the parade halted while the reviewing officers and distinguished guests of the Legion took their places in the stand. Passing the cenotaph in front of the custom house, in Canal street, the marchers honored their dead, commemorated by the monument. Bands were silenced and the dead saluted.

The announcement by Alvin M. Owsley of Texas that he would accept the nomination for the national command-in-chief of the Legion, was met with enthusiasm. The sentiment of the south, Mr. Owsley, a former attorney general of Texas and chairman for two years of the Americanization Commission of the Legion, announced Wednesday, in which it was declared a deliberate effort was being made to inject a pro-war into the school text books in many parts of America.

The report also contained a declaration in favor of the total exclusion of immigrants from the United States and asserting against the League of Nations. Agents of the Soviet Russia.

## Cupid's Latest Hiding Place of Illicit Whiskey

Albany, N. Y.—Moonshine concealed in a cupid is the latest means taken by saloon keepers to build day agents, the federal prohibition officers announced Wednesday. Agents raided the saloon of George Besting here late yesterday, it was said, and were about to leave without finding any liquor when one of them happened to kick a cupid at the end of the bar. There was a suspicious sound and the agent investigated. The cupid was clean, he discovered, and inside was a pint of moonshine.

## ELKS SELL HOME SITE TO PARKER

Pen Company Undecided on Plans—Lodge to Seek New Piece of Property.

Sale of the property on the corner of South Bluff and Court streets bought by them in 1921, was made by the local lodge of Elks, Tuesday, to the Parker Pen company. The transaction was completed after a vote was taken by the members.

The price was \$12,118. The property is 65 feet on Bluff street and 132 feet on Court street, giving the Parker company all the property on Court from Division to Bluff street.

Inquiry at the Parker concern, Wednesday, brought out that no decision as to the use of the property will be made for several weeks. It is possible a building may be erected on the site, and efforts to gold pen points on a larger scale than now turned out.

## Lloyd George's "Warlike Animals" Talk Peeves Turk

[BY ASSOCIATED PRESS.] Constantinople.—Prime Minister Lloyd George's Manchester speech on the near east, of which a summary has reached Constantinople, has created a furore among the Kemalists followers here. The entire summary was telegraphed immediately to Ankara.

"This speech," said the Kemalists representative here, "completely shatters the confidence which we were reposing in Great Britain after her assurances to us at Mudania."

The phase in which, as received here, the Kemalists were compared with "warlike animals," particularly displeased the nationalists.

## PREMIER TO QUIT IF AIDE IS BEATEN

### Life of Lloyd George Ministry Hangs on Thursday Developments.

[BY ASSOCIATED PRESS.] London.—Whether Premier Lloyd George, whose administration has long outlasted the administration of all the great statesmen concerned in the Versailles treaty and the making of peace, will fall as a secondary effect of Mustafa Kemal's victory in Anatolia, still hangs on the result of Thursday's meeting of the unionist members of the commons.

The political correspondent of the Central News claims to be able to state positively that if Mr. Chamberlain emerges successfully from Thursday's meeting, Lloyd George will at Leeds on Saturday announce the immediate dissolution of parliament.

In all political quarters in London there was a state of feverish activity, meetings and consultations occupying the entire day. The premier himself returned to town and besides attending to the members of his cabinet presided Tuesday night over a large meeting of liberal ministers, undersecretaries, party whips and others.

## Put Embargo on Potatoes

[BY ASSOCIATED PRESS.] Madison.—An embargo on all carload shipments of potatoes to Chicago was ordered Wednesday by the C. and M. V. railway company. Agents of the state department of markets was informed. Accumulation of potatoes at the markets which are no longer able to take care of the shipments is given as the cause of the order. When ever farmers have definite markets for their products for deliveries to points other than Chicago, cars will be furnished, the railroad company announced.

## Attempt Made to Loot Premo Store

Unsuccessful efforts were made to break into Premo Brothers' hardware store, 21 North Main street, early Wednesday morning.

Upon opening up the store, the proprietors noted that "bums" marked the front door but there was no sign of an entrance having been secured. Police were called to investigate.

## NEILLVILLE MAN HELD FOR MURDER

Neillsville.—Stanley Mrose, 21, was arrested by Sheriff Karcher on a charge of murder and is in jail here. Mrose is charged with killing Carl Bjalkinski, who lived near Stanley. In an altercation, Bjalkinski was knocked down and beaten and killed. He died after a week.

## HEALER'S DEATH DUE TO NATURAL CAUSES

[BY ASSOCIATED PRESS.] St. Louis.—The death of Francis Schiatter, alleged "divine healer," in a rooming house here Monday night, was caused from hemorrhages superinduced by tuberculosis. It was announced following an autopsy. The autopsy was performed following an assertion of Mrs. Schiatter, that she believed her husband to have been the victim of foul play.

## GENDARMERIE, FOR THRACE, FORBIDDEN TO ENTER CAPITAL

### BRITISH NAVY ORDERED TO HELP ENFORCE DECISION.

#### IS ALLIED EDICT

Turkish Population Disappointed; Planned Jubilee when Forces Appeared.

[BY ASSOCIATED PRESS.] Constantinople.—The allied missions reached an unanimous decision Wednesday forbidding the Kemalists gendarmie, destined for Thrace, to enter Constantinople.

The British navy has been ordered to stop all vessels bearing Turkish nationalist police.

The action was taken in the interest of public safety.

The order produced keen disappointment among the exuberant population, which had made preparations on a vast scale to welcome the Kemalists.

## Realty Men Form Grievance Board to Take Up Rents

For the purpose of forestalling any attempt at repetition of the high rent craze that gripped Janesville two years ago, local real estate men formed a grievance committee at a meeting at the Chamber of Commerce, Tuesday night.

Other contractors called by Manager Oscar N. Nelson of the Chamber, is one of a series to be held to make living conditions here such as to attract new residents, and keep pace with the city's needs.

Members of the United Presbyterian church from throughout Wisconsin are gathering, Wednesday and Thursday, at the Rock Prairie church for the state institute. The first session was at 2 p. m. Wednesday. The evening session is at 7:30.

## THEODORE ROBERTS DEFENDS HOLLYWOOD

[BY ASSOCIATED PRESS.] Omaha.—Theodore Roberts, prominent motion picture character actor, defended the motion picture colony of Hollywood, Calif., in an address before a local club Wednesday.

"All this stuff that seeps into the papers about the morals of the motion picture folks is the misguided work of press agents," declared the actor.

## BELOIT MAN BUYS INTO LOCAL PRINTERY

M. G. Thimmig, for 13 years superintendent, and for the last two years business manager of the Beloit Daily News, has purchased a half interest in the Brandenburg Printing company, this city. The transaction was closed with O. D. Brandenburg, Madison, Tuesday.

Mr. Thimmig will become business and mechanical manager of the concern, located on South Bluff street. George Kueck will be sales and service manager.

O. C. Homberger, for the past two years a stockholder, has sold his interest to the new partnership. He has not made any future plans as yet.

## SCHOOL HEADS VISIT WAUKESHA BUILDING

Super. E. O. Holt, public schools; Prin. W. W. Brown, high school; Supr. J. M. Dorrans, vocational schools; and V. E. Klontz, assistant principal high school, were on a tour of the schools in Waukesha and West Allis, Wednesday.

## THE WEATHER IN WISCONSIN

Fair Wednesday night, and Thursday night; Wednesday night; rising temperatures Thursday.

Paul Tratt, and Mrs. Ida Poynton.  
Mrs. Edward White and Mrs. Ed.  
Hempel were Milwaukee visitors on  
Wednesday.

Dr. and Mrs. Theodore Noehle formerly of Racine, and who with their three daughters have been visiting at the home of Mrs. Noehle's parents, Mr. and Mrs. H. Touissant

left Monday for Los Angeles where they will make their future home.

In Calcutta, India, there are 23 English Masonic lodges.

nine miles south of here, destroyed the mill, the storage warehouse of R. Connor and company and a small building nearby, causing a loss of approximately \$20,000.

**THE GAZETTE'S PLATFORM**  
Send every energy to finish the high school building as it may be used before the end of 1922. With the completion, the problem of the city center will be solved.  
Janesville needs and should have ample hotel facilities to care for the public. That will be the first step in the development of the city.  
Plan the city so that the high school is the largest building in the city.  
Place the city hall on the corner of the city hall and the city hall is the largest building in the city.  
Give the city hall a new look. There is now available \$15,000 for this purpose and it should not be used for any other. Finish the city hall and the city hall is the largest building in the city.  
Memorial Building for World War soldiers. The living and the dead—be also an historical building.

**WISCONSIN AS A WHOLE**  
Preparations for the Wisconsin products exposition go on rapidly and this collection of all the industries of the state under one roof, representative of what the state does and can do, should have weight with more than the people who come and see and go away. It should be an object lesson in interdependence and obligation of all classes of industry one upon the other. Every member of the new legislature should see this exhibit and ponder on the responsibility he has to the whole state when called upon to pass measures seeking special privilege for one class or another.  
No one class—and the word class is used in an occupational sense and not as a social division since in a republic there can be none set up by law—can live entirely selfishly and apart from contact with another in business and trade and commerce and industry. That very diversification of the industries of Wisconsin has made the state powerful in the business world. Dairying is a business and all farming calls for investment of capital far greater than even the smaller tradesman finds it necessary. Wages depend on the freedom of action for, and general prosperity of all branches of production in the state. The promoters of the Wisconsin Products exposition are from all these various industries. They have a common interest. It is one of the first efforts in the state to have organized cooperation of these productive industries working as a unit. For that reason it should be successful both as an exhibit and as an object lesson.

We ought not to have another war until all the books about the last one have been written.

**THE KU KLUX KLAN IN WISCONSIN**

However much we may object to the Ku Klux Klan as a part of the social and political life of Wisconsin it will probably make its appearance here as it has in other states. In Texas where it has its greatest membership, numbering some 150,000, it has been able to nominate a candidate for senator and other officials on county tickets. In Wisconsin there may be a lodge although this is denied. However, the charge that comes from the secretary of the democratic campaign committee that Gov. Blaine has the endorsement of the Klan and is its candidate, seems to lack detail. In all fairness such a charge should be made only when the evidence is conclusive and unquestioned. In Texas the candidate on the ticket for the United States senate was not at all adverse to being known as the Klan candidate.  
It is not surprising that the Klan is able to show such strength in the south. It was originally a child of the south, organized to frighten negroes and carpet baggers into submission and made possible the change in government from republicanism to democratic and eventually to disfranchisement of the negro with the Ku Klux Klan. But the Klan proselyting has been slower in the north and activities have been less pronounced than in the south where it was traditionally acceptable.  
We can get along without the Klan in the state of Wisconsin. It has as its basis of existence animosity to Catholics, Jews and negroes. Under the constitution of the United States all these races and religions are equal before the law with all others. De jure then the Ku Klux Klan is in violation of the constitution just as any other organization would be which had for its object the elevation of any person of any particular religion or race to the exclusion of any or all others. In actual fact it is comedy when it does not take itself too seriously and become tragic. Its acts, hypocritically said to be in the interest of justice and higher morals, are those of lawlessness, punishable by statute. For that reason it is a menace and intolerable. Whenever there comes restriction of right in religious views or whenever a candidate for office seeks election because he is of this or that religious faith and appeals to prejudice, we are in violation of the very foundation principles which made America possible both as a new settlement in its early history and a realization as a republic under a constitution with a Bill of Rights, the most liberal and definite ever devised. Bigotry has no place in America in governmental affairs and privately should be looked upon as a disease rather than an exhibition of sound sense. The Ku Klux Klan will die as other organizations have died when holding the same notion of spreading religious and racial prejudice.

Tale perhaps understands what the term "Corn Puck" means when it comes to the poetry of motion.

It was fitting that a memorial should be erected at Washington to the memory of Edmund Burke. No man in America made more eloquent pleas for the colonists than Burke in England who confronted the opposition face to face and told the

**More Power to the President**  
By FREDERIC J. HASKIN  
Washington.—With the enactment of the new tariff law the power of the president of the United States has been increased in a way and to a degree that doubtless was never dreamed of by the framers of the constitution. The American executive has long been the most powerful in the world, but from now on, unless the new law is amended or repealed, he may exercise authority under which he might become the absolute autocrat of the business affairs of the nation.  
Briefly stated, the provisions of the new law make it possible for the president to reduce or to increase customs duties. This is accomplished through what is termed the "flexible tariff."  
When it is considered that almost every business enterprise may be prospered or wrecked by the tariff, it will be no surprise to find that the president may be approximated.  
Now congress can blame only itself if it discards one of these duties that it has little to do except pass appropriation bills.  
It is true that tariff making is not placed entirely in the hands of the president under the new law. Some limitations are thrown around what he may do and he has to advise with the tariff commission. However, it is certain that the president now has powers such as none of his predecessors ever exercised and their full extent may not be realized until they have been tried out. Incidentally, in the course of the tryout it is quite possible that the constitutionality of this phase of the law may be attacked and the case carried to the supreme court for a final decision.

Under the head of special provisions the new law gives the president authority (1) to raise or to lower any rate in the bill not to exceed ten percent, and (2) to apply the American valuation plan of assessing and valuing duties, and to exclude articles of foreign production in special instances.  
Essentially an exemplification of the protective policy, the theory of the new law is that the duties levied on imports shall equalize the costs of production at home and abroad. It recognizes the fact that American standards of living are generally better and higher than in any other country, and that American labor is and must be better paid. To maintain these standards American producers and American labor must not be subjected to competition from abroad on terms that approximate equality of production costs, and the only way to accomplish this is through a tariff that will make it impossible for foreign producers to undersell us in our own markets.

The schedules of the new law are supposed to do this, but it is admitted that conditions surrounding production both at home and abroad change constantly and that it is desirable to have some sort of flexibility in the tariff rates. Hence, the discretionary authority vested in the president to raise or lower duties within a range of 10 percent. Furthermore, the president may exclude any article if in his judgment its importation would tend to injure an American industry.  
In determining differences in cost of production at home and abroad the president is directed to advise with the tariff commission, and no change in rates shall be made until the commission has heard the case and rendered a decision. This is somewhat of a check on the new powers of the president. However, it is not so much of a check just at this time for the reason that the president now has no vacancy to fill in the personnel of the tariff commission, with another vacancy in prospect. Manifestly the commission will be in harmony with the man who selects it. Senator McCumber, one of the men largely responsible for the new tariff law, is expected to receive one of these appointments.

During the administration of Theodore Roosevelt and again while Woodrow Wilson was in the White House much was heard about "executive usurpation." Those presidents were charged with encroaching on the powers and functions of congress and with repeated attempts to dictate what the legislative branch of the government should or should not do. Naturally much of this criticism came from senators and representatives, who resented being made what they termed "rubber stamps" for the man at the other end of Pennsylvania avenue.  
In this instance, however, the question may well be asked as to whether it is not an evidence that congress is abdication. Whatever answer is made to this question the hard fact remains that the constitution stipulates as one of the functions of congress that it shall have power "to lay and collect taxes, duties, imposts and excises," whereas the new law has delegated to the president the determination of all tariff rates.

Already the change has been made, too, that the courts have been encroaching on the powers of congress by nullifying laws on the grounds that they are not constitutional and, through judicial interpretations and decisions, giving force and effect to laws that congress did not contemplate when it enacted them. This is called legislation by judicial fiat and notice has been served that bills will be pressed for a consideration at the coming session of congress that are aimed to curb or check this tendency of the judiciary. It is even argued that the courts should not be permitted to declare any act of congress unconstitutional.

When the constitution was written the legislative branch of the government was taken up first. This may be urged as indicating that congress was regarded as of first importance and was to be in reality the supreme power of the republic, with the president essentially as an executive officer of congress acting second and the judiciary ranking third. Certain it is that Article I, devoted to congress, consists of nine sections, while Article II, defining the executive branch, includes but four sections and Article III, setting forth the judicial power of the United States, only three sections.  
An interesting possibility in event of any serious clash over the question of the respective functions and powers of the three divisions of the government is as to what would happen if congress undertook to curb the executive and the judiciary and those two branches sought to nullify any such action of congress by the exercise of the veto power and the power of the courts to declare a law unconstitutional. Congress can pass a law over the president's veto, but up to the present time it has been helpless when the veto has been adverse to any of its acts, save only that it may bring about an amendment of the constitution if the several states take kindly to such a proposal.

Friends of King George what would happen should the policy of force be continued. Burke, too, was one of the first in all England to admit the power of a free press, then in his time just beginning to assert itself. "There are three estates in parliament," said he referring to the Lords, Bishops and Commons, "but yonder sits a Fourth Estate more powerful than all three." He pointed to the press gallery where sat the writers for the few newspapers of the day.  
There has been so much scandal in the last week that Kemal Pasha has a hard time making the front page.  
Kemal Pasha says he wants American business men and promoters in Asia Minor and Thrace. Sometimes this fellow, Kemal, almost makes one like him.

As we have remarked before, Georgia will insist on keeping before the public eye whether it be an obituary or a scandal.

**JUST FOLKS**  
By EDGAR A. GUEST  
A WISH.  
This is what I want to be:  
Fit for every eye to see,  
Strong enough to do my task,  
More than that I need not ask;  
Big enough to brave a blow,  
Disappointment's touch of woe,  
Big of heart and generous of touch,  
Without whimpering too much.  
I should like to play the game  
Clean of hand and free from shame,  
Fighting hard, but when it's done  
And the battle's over, to be  
Coming home without regret,  
Leaving none that I have met  
Who could say I'd failed to be  
All that honor asked of me.

There are goals I hope to gain.  
But I want them free from stain.  
Want to earn them in the light,  
Want to make them mine by right;  
And above the decks I plan,  
First of all, I'd play the man,  
Though for glory's sake I dare,  
I would never be unfair.

This is what I'd like to be:  
Kind and brave and neighborly,  
Big of heart and broad of mind,  
Glad with every joy I find,  
Friendly as I go my way,  
Generous-handed, day by day,  
Keeping, though I rise or fall,  
The love and good esteem of all.  
(Copyright, 1922, by Edgar A. Guest)

**ON THE SPUR OF THE MOMENT**  
By ROY K. MOULTON  
I loved a girl called Lillie,  
And another girl called Pat,  
But I called Lillie "Pat," so silly,  
And that was the end of that.  
Now neither ever sees me,  
I'm off their address books,  
But the school that frees me—  
I call all "Snooks."

I fell in love with Helen,  
But she gave me the air  
When some impulse came pelling,  
Made me address her "Clair."  
'Twas only a trifling error,  
The trivialist of dukes,  
But since she raised such terror  
I call them "Snooks."

So if they're christened Daisy  
Or Florence, Sue or Nan,  
Here's a tip to the man who's lazy,  
Just follow this simple plan.  
Don't bother how they name their,  
For names are merely hooks,  
To hang on to the girl in her  
As just plain Snooks.

No use trying to take a motion picture of congress.  
It doesn't move fast enough.

**NO RACE SUICIDE HERE**

POSITION as housekeeper, lady of 22 years with 2 children, age 6 and 3; have no objections to other children. A. P. 22—Want ad. in N. Y. Times.

We note with considerable interest that, after a year or so of rumormongering, the Episcopal church in America has actually removed the word "obey" from the marriage service. At any rate, we can consider this only in the light of a matter of form. Censor leads us to admit that it does not really mean very much, from observation covering a number of years we feel justified in saying that any church could have taken that step at least a decade ago without causing a ripple of excitement or dismay on the part of the male sex. The brides themselves have come to consider it a mere formality to remove the objectionable word, and they have been successful.

**Who's Who Today**

**BRIG. GEN. W. D. CONNOR**  
Brig. Gen. William D. Connor has been appointed to take command of the American expeditionary force in China, according to a recent announcement by Secretary of War Weeks. General Connor, at present assistant chief of staff in the war department, is being sent to China to replace Col. William F. Martin, who is in command of the troops at Tientsin.  
Although the commanding officer of American troops in China has a comparatively small number of soldiers under him, two battalions of about 600 men, the post is one of importance because of the many questions there and delicate questions of diplomacy arise.  
One reason for the change of command is thought to be the need of an officer of higher rank than a colonel to represent the United States interests.

General Connor is a native of Beloit, Wisconsin. He is a comparatively young man to hold such high rank in the army, being only forty-eight years old. He was graduated from the U. S. Military Academy in 1907 and the Army Staff College in 1909. He served in the Philippine campaign during the Philippine insurrection and was city engineer in Manila from 1909 to 1910.  
Connor was made lieutenant colonel just after the United States entered the war in 1917 and was given the rank of brigadier general the following year. He served in France until January, 1919. He has been brigadier general in the "Legation Army" since August, 1919, and has been assistant chief of staff since August of the same year. He has been decorated with a D. S. M. and Croix de Guerre.

**LOOKING BACKWARD**

**FORTY YEARS AGO**  
Oct. 18, 1882.—The Wisconsin Telephone company are steadily extending their wires in this city. Today's Messrs. Rooney and Charlton's meat market was connected with the exchange line many of their customers now order by wire. The Wisconsin Shoe company is soon to be added to the exchange, also the residence of Mr. C. W. Hawes.

**THIRTY YEARS AGO**  
Oct. 15, 1892.—The failure of the cabbage crop this year is expected to boost prices. An agitation for the purchase of a site for a new city hall has again been started in the city. This time the lots on Main street across from the court house are favored. They belong to Nelson brothers, who will otherwise build a lively stable there.

**TWENTY YEARS AGO**  
Oct. 18, 1902.—National and state politics were discussed at the first meeting of the Twilight club of the season at the Myers hotel last night. The club is now entering upon its 27th year, and has decided to meet bi-monthly at the Y. M. C. A.—Almeron Eager, who recently died at his home in Evansville, left \$10,000 to the city for a library.

**TEN YEARS AGO**

Oct. 18, 1912.—Those who are expected to play in the national game against Delaware Saturday are Cummings, Jones, Shiller, Kiblow, Mohr, Dalton, Cannon, Koch, Connell (capt.) J. and L. Stewart, Dater, Ryan and O'Connor. If the team wins, they are in the run for state championship. It is the first time in a decade that the school has produced a championship team.

**WATCH.**  
What I say unto you I say unto all.  
Watch.—Mark 13: 37.

**Personal Health Service**

Noted Physician and Author

**BRONCHIAL REFLECTIONS**  
Doctors these days are looking into the bronchial tubes with the bronchoscope, and finding odd and ends lodged therein, such as buttons, safety pins, teeth, portions of artificial dentures, and successfully removing these accidentally inhaled or inhaled foreign bodies that happen to be in the bronchial tubes. This is a new thing, and the use of the bronchoscope, however, is a rather serious expedient resorted to in grave or desperate cases and not for routine work. It is on the part of the doctor, if we had a bronchoscope as simple to use as the stethoscope, we should hear much less of bronchitis and "bronchial trouble" for with such a diagnostic aid universally available, it would soon become apparent to everyone that all that produces cough and soreness or pain in the chest is not bronchitis by any means. When the chest begins to whistle or wheeze there is some ground for intimating the bronchial tubes. Indeed, the doctor with his naked stethoscope or his lightly clothed ear listens for wheezing or wheezy sounds, and such sounds before he can positively determine that the patient has bronchitis. A good half of all the cases of alleged bronchitis or "bronchial trouble" have never uttered by such a diagnostic aid universally available, it would soon become apparent to everyone that all that produces cough and soreness or pain in the chest is not bronchitis by any means. When the chest begins to whistle or wheeze there is some ground for intimating the bronchial tubes. Indeed, the doctor with his naked stethoscope or his lightly clothed ear listens for wheezing or wheezy sounds, and such sounds before he can positively determine that the patient has bronchitis. A good half of all the cases of alleged bronchitis or "bronchial trouble" have never uttered by such a diagnostic aid universally available, it would soon become apparent to everyone that all that produces cough and soreness or pain in the chest is not bronchitis by any means. When the chest begins to whistle or wheeze there is some ground for intimating the bronchial tubes. Indeed, the doctor with his naked stethoscope or his lightly clothed ear listens for wheezing or wheezy sounds, and such sounds before he can positively determine that the patient has bronchitis. My solution to the mystery of the "Black Menace" is:

\$10 gold will be awarded first correct solution received at Gazette Office from reader residing outside of Jamesville.

Year's subscription will be awarded the second correct solution received at the Gazette from reader residing outside of Jamesville.

\$10 gold will be awarded first correct solution received at Gazette Office from reader residing within City of Jamesville.

Year's subscription will be awarded the second correct solution received at the Gazette from reader residing within the City of Jamesville.

### WHAT HAS GONE BEFORE.

Clare Claremont, finding on the death of a respected uncle that she is penniless and her fortune of a million dollars has been dissipated, discovers that she has been a victim of the Black Menace, a notorious society blackmailer. She appeals to Raveland, a society detective, and to Cray, a society detective, and a society detective to aid her. Clare is engaged to her reporter, whose father is wealthy, but has determined the son shall earn a living. Kennedy also has a warning from Hilkey. Cray, a wealthy bachelor, not to attempt to aid Clare. Kennedy hastens to the Cray home, Kennedy finds that the Cray man is dead and investigates the cause. Raveland and Kennedy agree on a plan of action.

An effort to kidnap Clare Claremont is made, but owing to the rapid work of Jack Speed, one of the kidnapers, escapes and is followed. In the meantime Kennedy finds evidence of the Cray man's death in a letter. The detective discovers a country house where it is believed the kidnaping has its headquarters. Mrs. Celia Freshkova, a beautiful and mysterious Russian, enters the story.

It was a most ingenious form of attack. Only Kennedy's luck and prompt action had frustrated it. And yet was that all that menaced Clare? Where was she? Why had Clare and Speed not returned?

Almost I began to feel that we had no right to let this young lady travel about in any but our own company. The moment she was away from us, that moment something dastardly seemed to happen.

Had Kennedy rescued her from this strange scientific attack only to have her fall into another trap, less scientific perhaps, but equally dangerous?

We had no idea which way to turn and were debating whether to institute a police search when there came the grinding of the brakes of a car outside and to our infinite relief we heard Clare and Speed, with Raveland, at the door.

They burst in in great excitement. "Such an experience as we have had," cried Clare breathlessly, in answer to Kennedy's inquiry what had delayed them.

"Yes," exclaimed Speed. "Just listen to this. Perhaps you can figure it out. We were howling along at a good clip on the way home when suddenly ahead I saw a rope stretched across the road with a rope ladder in the center. You know no one, unsuspecting, is going to drive right at a thing like that. I slowed up and we approached it."

"It was a good thing Jack didn't stop," interrupted Clare.

"Yes," he continued. "For just

then there was a shot, from a field at the side of us. I knew then that it was some sort of attack. Just what to do, whether to return it or run, I didn't know. With Clare in the car, I looked over in the direction of the shot and I saw something moving in the shadows of the field. I called at it, but there was no answer. Instead there was another shot, wild too, for I did not stop moving, but drove right on at the red light.

"I always carry a gun," went on Speed, "right down in a special pocket of the gear shift, so that I can reach for it without exciting suspicion and get the drop on anyone if I have half a chance in a hold-up. I grabbed it, aimed a bit, and fired—no one, but several times.

"I know I must have hit the thing too, for I'm a pretty good shot. And yet, it went on through the field and escaped—and left not a trace. 'Yes—and then what do you think the foolish boy did?' asked Clare, although one could see that there was scarcely a great admiration for him. "Got out of the car and started over the field after the thing."

"You and Raveland didn't have to follow, though," defended Speed. "Do you think I'd let you stick your head right into danger, and get hurt by?" returned Clare. "Of course we ran in after you."

"Did you get it?" demanded Kennedy, eagerly interested. "No," exclaimed Speed. "In spite of us the thing went away. I think it for a moment expected the attack I made. You know I've had some experience in guerilla warfare down in Mexico. I can go after anything and hide behind a blade of grass, almost. Well, it got away, the grass all around was trampled. This is what I found.

He handed Kennedy a couple of misshapen pieces of metal. Cray took them and examined them. "They were bullets all right," he remarked, as he studied them. "Yes, I knew I hit the thing. When I found them, I tell you I was glad that the thing had disappeared. I didn't want to get up against anything that will stop a bullet like that."

"But the figure," continued Kennedy. "What was it like?" "I can't describe it exactly," replied Speed, endeavoring to recall what he could. "It was like a man, perhaps—only bulkier. I noticed that it had a peculiarly pointed head, that wasn't even human. But there was a head, if you can call it that. It seemed to have arms and legs—must have had them, or it couldn't have fired at us and then get away."

"If it hadn't fired," put in Raveland, "I might have thought it was some rough-hewn beast. But it couldn't have been that."

"Or a witch," but in Clare, "although ghosts don't stop bullets that some of the ghosts I've ever heard of."

"No, it wasn't a beast and it wasn't a ghost," decided Speed. "It may have been an outlandish figure, horrible, but it was some kind of a man. I'll wager the thing was a man. Kennedy pondered deeply on the experience.

"I'll have to study these things," he remarked, dropping the two misshapen bullets into his pocket. "Evidently someone is willing to go to almost any length to get you," he

reins. The raisin flavor permeates the bread. You've never tasted finer food. Order a loaf now and count the raisins.

Raisin bread is a rare combination of nutritious cereal and fruit—both good and good for you. Serve at least twice weekly to get the benefits.

Use Sun-Maid for home cooking of puddings, cakes, cookies, etc.

You may be offered other brands that you know less well than Sun-Maid's, but the kind you want is the kind you know is good. Insist, therefore, on Sun-Maid brand. They cost no more than ordinary raisins.

Mail coupon for free book of tested "Sun-Maid Recipes."

Your retailer should sell you Sun-Maid Raisins for not more than the following prices:

Seeded (in 15 oz. blue package)—20c

Seedless (in 15 oz. red package)—18c

Seeded and Seedless (11 oz.)—15c

# Heavy Bowling Year Looms as Industrials Get Started

Copyright 1920 by Geo. McManus

**CLUBMEN ENTERING FOLD; 8 CIRCUITS ARE IN FORMATION**

**WEDNESDAY GAMES**  
Gazette vs. Shurtliff ..... 1-2  
Postwick vs. Traction Co. .... 4-5  
Varsity vs. Carr Grocery ..... 6-7

With two leagues already bowling—the Knights of Columbus and the Moose—the industrial-commercial circuit getting under full driving power Wednesday night, all bowling prospects in Janesville are looking better than last season which was a record breaker. The steady work of the Janesville Bowling association is putting the annual tournament on a firm basis.

Eight loops are the plan for the 1922-23 season. The additional outfits will be the City League, Lakota club league, Rotary, Kiwanis and Lions club leagues. Bowling was the Y. W. C. A. will roll. The American Legion is talking about the same.

**CITY LEAGUE MEETING**  
**CALL FOR THURSDAY**  
A meeting of the city league will be held at the Chamber of Commerce at 8 p. m. Thursday. The schedule is expected to be ready for the officers and team captains. It will remain to put in the names of the teams and get the circuit started next week. Probable teams are Gazette, Cadillac, West Side, City Hall, Crown Dairy, Neil Hotel, Knapp, Billards and Nitscher Sales company.

In the call for the meeting, President Otto Papke extends an invitation to all bowlers in town to attend. The league desires to get the men here and distribute them among its circuits.

**LAKOTAS ARE FORMING**  
**EIGHT TEAM OUTFIT**  
An eight team, 5-man organization is now being lined up by the Lakota club to bowl Friday nights on the West Side. Ralph Southman, first chairmen of a committee of which the other members are Louis Shea and Ben Kuhlman.

The Lakotas already have 35 men signed up. Rolling will be on the basis of low man dropping out each week. Play is expected to start Oct. 27.

**LIONS' DEN STARTS**  
**PRACTICE ROLLING**  
There is some talk of forming a combination Rotary-Kiwanis-Lions league, but nothing definite has been arranged. One plan is to have four teams from each organization, bowling them all in one large circuit, but there is some opposition to this plan. In the meantime, the Lions rolled Tuesday night and last Wednesday, having about 20 men out. Lee Schuster is chairman.

The Rotary club plans to start bowling Oct. 26 and will roll Thursday nights. This organization plans its own league, the same as last year, rolling against the Kiwanis and Lions once a month. Ed. Kohler is in charge.

**HOWARD JONES, THE COACH WHO LOWERED YALE**

Howard Jones, and to him the credit for forming the team out of Iowa, the past two years, starting the conference.

## Busy Man's Sport Page

By FRANK SINGLAI

WITH INTENT to provide good games and to play with the sport, the Black Cat basketball team should have the full support of Janesville. Announcement that the same plan will be followed as used by the Black Cat basketball team last year is assurance of a policy worthy of utmost public support.

THIS LINEUP of the aggregation is attractive upon paper. It brings together a group of young fellows that have shown well on past teams, but abjectly and from the standpoint of the manager. This is promise enough that the fans will get what they go after—basketball.

THIS class of basketball does not bring a group of great stars to the city. It put before us boys whom we know, which should counteract the desire some have to see satellites shining before them. Big stars may show before individual work, but too often they lack team work. A home talent team is more apt to put up closer games, filled with real light.

THAT this class of team puts up the real stuff was shown by the Black Cat basketball club. People that were constant spectators in other cities, that have highly professional teams, first paid visits to the "Pussies" back yard out of curiosity. They found more fun, more spirit than the more expensive, more skillful ball. The same will be true of basketball.

ANOTHER fact is that this kind of team is naturally interested in the community, because it is the only one after the game, and the most it can get. Like so many other outfits that sprang upon cities of this size. Give the boys a boost.

Warren Keshola breaks world 150-yd. backstroke mark in 2:34 1-5 and Mariechen Welschka swam 225-yd. free style in 1:50 for record at Honolulu.

George (Swede) Dahlgren, aged 23, heads Detroit college "B" club.

**Scamps About Scrappers**—Jimmy Delaney, St. Paul, signed to meet Harry Campbell, Chicago, at the Okla. City, Nov. 11 (10). Billie Ryan and "Cowboy" Padgett, welter, clash at Cincinnati, Oct. 23. Johnny Meyers, middleweight wrestling champ, and Joe O'Connell, Chicago, Oct. 27.—Beating Siki to meet Kid Norfolk in New York late in November in \$25,000 fight, says Rickard.

Hank Morino defeated Jimmy Smith, 6 out of 10, in special bowling match at Chicago, and then Smith lost to Sykes Thomas 6 out of 9.

**Stove League Kindling**—Lundis distributes money of world series to Yanks and Giants, but no disposition made of the game shekels although 50 charities have made application. Dodge club of Western league sued on ball park contract.—Joliet club seeking players.—Plans revived to form Ohio baseball circuit.—Port Worth club called best in southland.

Rain halts grand circuit racing at Evansville, Ind.

U. S. sends delegates to London tennis meeting.

Louisiana beat New York, 45 1/2 to 47, with Mississippi third with 43 1/2 points, in American legion truck meet at New Orleans.

**Hot Off the Gridiron**—Gibson in uniform as Badgers try out new plays in hard work out for Indiana.—Hoosiers send freshmen against varsity with Wisconsin aerial attack but fail to gain ground.—Chicago regulars take defensive and let scrubs get away with end runs in a hard scrimmage featuring Purdue plays.

Jones added to guard on Wolverines who leave for Ohio State Thursday after stiff drill.—Klein shifted to center and Pauley to tackle on Ohio team in readiness for stadium demolition game in which 79,000 spectators were sold.—Iowa will knock off Illinois Saturday if it obeys an order of the Iowa city council to win all its remaining games and in preparation a new carrying play has been evolved.—Illinois has little hopes of doing anything but try to hold the score of Iowa as low as possible, especially since Woodward, Richards, Robinson and Clark held out by faculty orders.—Notre Dame sends second string men against freshmen, who use DePauw plays.—Weakness in the line causing many changes in array at Princeton where the regulars shoved across two touchdowns against underclassmen.—Northwestern satisfied with line, drilling the backfield for Minnesota.

Leo Diegel, former New Orleans professional, beat Abe Mitchell, British pro, 5 up and 4 in special 30-hole golf match.

**FOOTBALL ROUGH, SAYS GRAN'MA, 88**

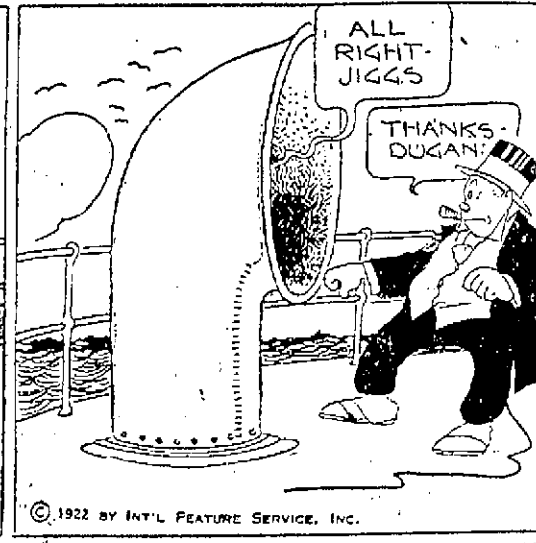

New York—"Pears to me, now I've seen the first game of my life, that football is pretty rough stuff," said Mrs. D. N. Richardson, 88, grandmother who brought 25 relatives from Davenport, Ia., to see her Iowa boys win their big game against Yale Saturday.

Mrs. Richardson is staying over in New York a few days before returning to Iowa in the private car she chartered for the trip.

"When I saw those young players scratched that every once in a while, my heart just went out to them," she said. "They needed mothering and I wanted to give it to them. I forgot all about the score."

**HELLO 2500 WANT AD. DEPT.**  
Tell All And Sell All Start Advertising TODAY

## BRINGING UP FATHER

## Blind Basket Five Desires Contests

Now that the basketball season is approaching, enthusiasm for the sport is running high at the State School for the Blind here. Both boys and girls teams have been formed under supervision of Miss Theresa Duda, physical director. Practice games are held in the school gym, Mondays and Thursdays, eight for boys and Tuesday and Friday nights for girls. Any amateur team in the city wanting a good game may have it by making arrangements with Miss Duda, who is anxious that her teams give practice with outside teams.

## Basket School for H. S. Coaches

Madison—Thirty basket ball coaches in Wisconsin high schools have accepted their invitation to attend a two-day basketball coaching school to be conducted at Waupun, Dec. 1 and 2, under auspices of the University of Wisconsin extension division. This is the first school of its kind.

Dr. W. E. Menzies, professor of physical education at the university and varsity basketball coach will conduct the meetings.

The purpose of the school, given for the first time, is to give basketball coaches not only technical knowledge of the game but also a clear idea on preparing high school boys for participation in basketball games, and how to supervise their physical condition so as to keep them fit. Good sportsmanship will be emphasized.

**HUSBAND OF FORMER POLICE WOMAN FOUND UNCONSCIOUS IN ROAD**  
Milwaukee—A new phase of the machine police scandal developed here Tuesday when William D. Longacre, husband of Mrs. Elma Longacre, former police woman who recently resigned amid much gossip, was picked up unconscious suffering from what was declared by Mr. Longacre to be a blow on the head.

"I know of no reason why anyone should have struck me, unless it was for revenge for some fancied harm in connection with the police case," he said.

In an interview, Mr. Longacre said the rumors concerning his wife were lies, that there was no better woman in the world than he believed and trusted implicitly in her.

**"HICK," FINNEGAN'S PRIZE AIREDALE, GIVEN NEW HOME**  
"Hick," the prize Airedale dog, the pet of the Samson plant, now has a new home in Minneapolis.

Her caretaker, Charles Finnegan, former inmate at the Samson, is now working with his brother-in-law, Albert Kneff, in a Minneapolis employment agency.

Numerous offers have been received by Finnegan from Twin City people to purchase the Airedale named after the "Old Hickory" powder plant. Apparently money cannot buy the dog.

**CHARNED HULK OF LINER IS SENT TO BOTTOM BY GUNFIRE**  
San Francisco.—With colors flying, the liner City of Honolulu, gutted by fire last Thursday, sank in 2,500 fathoms of water Tuesday after the coast guard cutter, Shawnee, had poured 21 shots into the hulk, according to a radiogram received by the coast guard here. The City of Honolulu's grave was more than 600 miles southwest of San Francisco. Not a person was injured when she caught fire and was abandoned.

**WOULD'N'T YOU LIKE A REALLY GOOD HOT COAL FOR YOUR FURNACE, BOILER OR STOVE? TRY ENERGY COAL**

**WE SELL IT FIFIELD LUMBER CO.**

## Railroad Jack Stacks Sports in Think Box

Railroad Jack, the memory expert who is making his headquarters for the winter in Janesville, is bringing his historical dope up to date. Not that he has not been on the job in the past, but he is now getting ready to spring the facts of sports. He is hard at work studying the lives of great athletes, including baseball players, and especially boxers. Although he is able to hold large audiences and prominent ones, with his store of information upon the big men of history, he feels he can hold larger ones by adding sports to his list.

## "YW" to Fete Big Net Year

Tennis players of the Y. W. C. A. will toast the close of a successful season in a banquet to be held in the "Y" rooms at 7 p. m. Friday. This will be presented to the following winners:

Miss Lillian Connell for advanced singles; Miss Hazel Lowry for beginners' singles; and the Misses Evelyn Chapman and Hazel Lowry for doubles.

Miss Connell will be toastmaster.

**CHARNED HULK OF LINER IS SENT TO BOTTOM BY GUNFIRE**  
San Francisco.—With colors flying, the liner City of Honolulu, gutted by fire last Thursday, sank in 2,500 fathoms of water Tuesday after the coast guard cutter, Shawnee, had poured 21 shots into the hulk, according to a radiogram received by the coast guard here. ## First Real Big 10 Games Will Start Dope Mixtures

**CONFERENCE STANDINGS**  
W. L. Pct.  
Chicago ..... 1 0 1.000  
Minnesota ..... 1 0 1.000  
Northwestern ..... 0 1 .000  
Indiana ..... 0 1 .000  
Note: Other teams have not yet appeared in conference competition.

**SATURDAY'S GAMES.**  
Indiana at Wisconsin.  
Purdue at Chicago.  
Iowa at Illinois.  
Michigan at Ohio State.  
Minnesota at Northwestern.

All western conference teams will be in Big Ten competition next Saturday. If comparative scores are worth anything, five strong teams are lined up against five weaker ones.

With the Badger passing game working to perfection and Bud Williams sure to be back at half, Indiana should not be so hard for Coach Richardson's aggression to knock off. The Hoosiers are already behind in the race, having lost to Minnesota. They were held to a scoreless tie by the eleven from DePaul. On the other hand, the Wisconsin team has felled both Carlton and South Dakota decisively and has saved its best men for their first conference battle. It will be the first time Wisconsin and Indiana have met in 10 years.

**TOWN LOOKS FOR TITLE**  
The boys from the Hawkeye state

already are feeling low for the conference championship, now that the winners of last year's race have lowered the flag of the east through last Saturday's defeat of Yale. Howard Jones' aggregation should easily get rid of Illinois, which dropped its first game of the season to Butler.

Stagg's Maroons appear to be among the strongest of the circuit this year. Chicago tore through Georgia easily and then gave Northwestern a stiff "knock" last week. The Windy city eleven will meet Purdue, which was hit a hard blow by Notre Dame last week after they had trimmed Mitten the week before by a small score.

**Real Dope After Saturday**  
Saturday's close game looms up as that between Michigan and Ohio state. In both big pre-conference games Ohio has been held to small scores by both Ohio Wesleyan and Oberlin. Michigan, likewise, has not done so much. Although they defeated Case, 45 to 6, that was to be expected, but it was rather a surprise when Vanderbilt held them to a no-count tie at Nashville last Saturday.

Following the battle's this weekend, the real dope will start to flow and then the race will become interesting.

## CAPITOL GROUNDS TOO INVITING FOR GOLFING ATTACHES

Washington—Although "Keep off the grass" signs on the national capitol grounds have worked against Coxey's army and others, they have no terror for golf bugs, which now have invaded the spacious capitol green sward for the first time in its history. The national golf epidemic has spread to the capitol lawn, those behind the senate office building being used daily by senate attaches for practice with the public, masha and putter. Flying golf balls have so endangered senatorial office windows, that arrangements are being made to limit the lawn's use to putting by installing a practice clock course, country club fashion, with little cups, flags and other golf bag atmosphere.

## FORT HIGH DESIRES TURKEY DAY GAME

[SPECIAL TO THE GAZETTE]  
Fort Atkinson—With three victories and no defeats to her credit, Fort high school looms strong on the 1922 gridiron. Fort has a strong aggregation this year and will make it interesting for all opponents. The local "prep" school would like to hear from a team to play here on Turkey day.

## Soccer Outfit Books Swede Team

After holding the Rockford Union to a tie and losing one game to that outfit, the Janesville Soccer club will play the Rockford Swedish Americans at the fair grounds here next Saturday afternoon. The game was booked Monday.

Negotiations are pending for a contest with the MacWhites of Kenosha. This game probably will be played here Thanksgiving day.

It is also possible that a game will be played with undergraduates of the University of Wisconsin upon the local field. Gymnastic instructor Linden of the Badgers gives soccer as a requisite for gym credits. One of his teams may be brought here.

## Bag 42 Ducks on Trip North

Frank Kennedy, Henry Clunk and Glen Chase returned home Tuesday night from a hunting trip in northern Wisconsin where they bagged 42 ducks.

## McAULIFFE TO PUT FEED BAG ON CATS

William McAuliffe, 995 Center st., will entertain the Black Cat baseball team at his residence at 6:30 p. m. Thursday.

The wealth of its experience and manufacturing resources enables Packard to endow the Single-Six with striking superiority.

More than that, it establishes a basis of production that now places the Single-Six within reach of the greater group which aspires to Packard ownership.

It remained for Packard—with its mastery of costs and production—thus to demonstrate the revolutionary value that can be built into a car of the finest quality.
